NEWS RELEASE

Aldershot announces expansion of its land position at the Wray Mesa Uranium Exploration Project

Highlights

- **An additional 28 mining claims totaling 578.5 acres (234.1 hectares) were added to the Wray Mesa Project.**
- **The new claims are expected to completely encompass the high grade uranium/vanadium deposit associated with the historic Geo #1 Mine**
- **Eight drill holes in the current drilling program have been completed to date and continues to provide encouraging results**
- **Project located within 34 road miles (55 km) of EFR’s proposed Piñon Ridge Mill site**

Aldershot Resources Ltd. (“Aldershot” or the "Company"), is pleased to announce that Royal USA Inc, a wholly owned subsidiary of Aldershot, has staked additional mining claims around its holdings over the Geo #1 mine in Lynx-Royal JV’s Wray Mesa Project area near Paradox, CO. The mining claims are located in the La Sal Mining District of western Colorado near the Utah border. Dennison’s operating Pandora Mine is located to the west.

Mining Claim Selection

The mining claim targets were selected due to their proximity to the historic Geo #1 Mine which was in operation until the mid-late 1980's when it was shut down due to depressed uranium pricing. The mine, purportedly, was an excellent producer of high grade uranium and vanadium.

The Lynx-Royal JV has been closely monitoring the land position of this area and when it was determined that the previous claimants let their claims drop, Lynx-Royal quickly staked the new mining claims.

Although there is very little physical data, field investigations, previous drilling results coupled with the data from an old map, and comments from the previous operators make this a very strong target. The current round of drilling, announced September 20, 2011, is progressing well and continues to provide encouraging results. Eight drill holes have been completed to date with several showing significant mineralization. A full report will be provided upon completion of drilling.

The Geo #1 Mine is located approximately 34 road miles (54 km) from Energy Fuels Resources (EFR) proposed Piñon Ridge Mill site. Royal USA is in two strategic joint ventures with EFR.

This press release has been reviewed and approved by Michael G. Leidich, P.E., a qualified person as defined in NI 43-101.

About Royal USA Inc.

Aldershot's wholly owned US subsidiary, Royal USA Inc. is a mineral exploration and development company focused on mineral resources in the western United States of America. The Lynx-Royal Joint Venture is managed and operated by Royal USA which maintains a 90% interest in the JV. Lynx E&M LLC, a private company, is the minority partner.

Michael Leidich, P.E., VP Royal USA Inc. said, "*Lynx-Royal has created a very strong land position surrounding the Geo #1 Mine. As the drilling and field investigations continue, we continue to believe that this area will be a strong uranium and vanadium producer in the near future.*"
