The accompanying notes are an integral part of these consolidated financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN UNCERTAINTY

Aldershot Resources Ltd. (the “Company”) is engaged in the acquisition, exploration and development of resource properties. The Company is in the exploration stage and has not yet determined whether their properties contain enough mineral reserves, such that their recovery would be economically viable.

The Company has incurred losses since inception and as at October 31, 2010, the Company had an accumulated deficit of \$18,724,103. These consolidated financial statements are prepared in accordance with Canadian generally accepted accounting principles on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The ability of the Company to continue as a going concern is in substantial doubt and is dependent upon the continued support from its directors, the ability to continue to raise adequate financing or achieving profitable operations in the future, the outcome of which cannot be predicted at this time. Management is seeking financing and business opportunities, including joint venture or merger opportunities or acquisition of properties to continue operations. Financing options available to the Company include public equity financings and loans. These consolidated financial statements do not reflect any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue in business.

2. SIGNIFICANT ACCOUNTING POLICIES

These consolidated interim financial statements have been prepared using the same accounting policies and methods of their application as the most recent annual financial statements of the Company. These consolidated interim financial statements do not include all disclosures normally provided in the annual financial statements and should be read in conjunction with the Company’s audited financial statements for the year ended January 31, 2010. In management’s opinion, all adjustments necessary for fair presentation have been included in these consolidated interim financial statements. Interim results are not necessarily indicative of the results expected for the fiscal year. Certain comparative figures have been reclassified to conform to the current period’s presentation.

New Canadian Accounting Standards

In February 2008, the CICA Accounting Standards Board confirmed that the use of International Financial Reporting Standards (“IFRS”) will be required in 2011 for public companies in Canada (i.e., IFRS will replace Canadian generally accepted accounting principles for public companies). The official changeover date will apply for interim and financial statements relating to fiscal years beginning on or after January 1, 2011.

The Company has determined that the key elements of this IFRS changeover on the Company will be in the areas of accounting for resource properties’ acquisition and exploration costs, accounting for share capital including stock options and warrants valuations and general IFRS disclosure requirements. The Company is currently assessing the specific impact on the Company’s financial reporting and finalizing an implementation timetable.

ALDRESHOT RESOURCES LTD.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
OCTOBER 31, 2010
(Unaudited – Prepared by Management)

3. DEPOSITS

During the quarter ended October 31, 2010, the Company commenced due diligence on certain uranium properties in the United States. Pursuant to a Standstill Agreement with American Nuclear Resources LLC (“ANR”), the Company advanced a non-refundable deposit of \$160,725 (USD \$150,000) which prohibits ANR from marketing or disposing of the properties for a period of ninety days while the Company conducts its due diligence. This exclusivity period expired on November 19, 2010 and the deposit was therefore written off effective on this date.

4. EQUIPMENT

	October 31 2010			January 31 2010

	\$ 160,527	\$ 122,649	\$ 37,828	\$ 160,527	\$ 111,708	\$ 48,819

5. RESOURCE PROPERTIES

The Company has entered into various agreements with other joint venture partners to conduct exploration work on its resource properties. There is no carrying value of the Company’s resource properties. The current status of the Company’s resource properties is described below.

Australia

These licences are granted by the local governments and are subject to various mining regulations and reporting in order to maintain them in good standing which the Company has complied with.

i) Northern Territory

During the year ended January 31, 2010, the Company partnered with Royal Resources Limited (“Royal”), a related company that has a director in common with the Company, granting Royal the option to acquire a 60% interest in certain of the Company’s licences, focusing on uranium mineralization, in the Northern Territory. Under the terms of the agreement, Royal paid the Company \$83,937 (AUD \$100,000) and must spend at least AUD \$900,000 (CAD \$765,000) of exploration expenditures on the properties over a three year period. Once the required level of expenditures are made by Royal, the Company must pay its pro-rata share of costs to retain its 40% ownership of the property. The Company also retains a 2% NSR on the Mt. Thomas licence in the Northern Territory which it sold previously.

5. RESOURCE PROPERTIES (cont'd)

ii) Western Australia—Turee Creek

During the year ended January 31, 2009, the Company entered into an agreement with Cameco Australia Pty Ltd. (“Cameco”) granting Cameco the option to acquire a 70% interest in the Turee Creek licence, with the focus on uranium mineralization. Under the terms of the agreement, Cameco paid the Company \$197,474 and must spend at least AUD \$2,500,000 (CAD \$2,125,000) of exploration expenditures on the property over a four year period. Once the required level of expenditures are made by Cameco, the Company must pay its pro-rata share of costs to retain its 30% ownership of the property. Subsequent to the quarter-end, Cameco advised the Company that they would not be proceeding with any further exploration on this licence and terminated their rights under the Agreement.

iii) Western Australia—Yuinmery

The Company maintains a licence in this area. All rents have been paid and reports submitted as required to maintain the licence in good standing. Subsequent to the quarter-end, the Company granted a non-related purchaser the option to acquire this licence (Note 12).

iv) South Australia—Martin’s Well Project

During the three month’s ended April 30, 2010, the Company entered into an agreement with Strategic Minerals Corporation whereby the Company may acquire a 70% interest in a mining licence, focusing on iron ore mineralization, in South Australia by spending AUD \$250,000 (CAD \$237,500) in exploration expenditures over a two year period.

The Company has a total of \$8,914 (January 31, 2010 - \$12,284) in guarantees for two properties in Australia regarding performance under two separate exploration licences. These funds are held as term deposits and are restricted from general operation business funds.

Kariba Project, Republic of Zambia, Africa

The Company has been granted two prospecting licences in Zambia near Lake Kariba. During the year ended January 31, 2010, the Company has entered into an agreement with African Energy Resources Zambia Ltd. (“African Energy”) granting African Energy the option to acquire an initial 51% interest in these two licences in Zambia. Under the terms of the agreement, African Energy must spend at least AUD \$500,000 (CAD \$425,000) of exploration expenditures on the properties over a three year period. African Energy can increase its ownership to 70% through the completion of a Prefeasibility Study on an inferred resource. Once the required level of expenditures are made by African Energy, the Company must pay its pro-rata share of costs to retain its 49% ownership of the property.

6. DEBENTURE PAYABLE

During the three months ended July 31, 2010 the Company received funds of \$100,000 pursuant to a debenture agreement with a company controlled by a director of the Company. The debenture is unsecured, bears interest at 10% per annum and is due on or before December 31, 2011. The debenture and any accrued interest owing is convertible into common shares of the Company at the lender's option at \$0.10 per share until December 31, 2011. The Company may repay the debenture at any time prior to maturity. A total of 1,000,000 common shares may be issuable in conjunction with the conversion of this debenture.

In accordance with generally accepted accounting principles, the fair value of the conversion option has been calculated using *the Black-Scholes Option Pricing Model* with the following assumptions: risk-free interest rate of 1.45%; expected life of 1½ years; volatility of 167.9% and dividend yield of 0.0%. The resultant value of \$14,916 has been reclassified to contributed surplus and will be accreted over the life of the debenture. For the nine months ended October 31, 2010, \$9,267 has been accreted and is included in interest and bank charges expense, along with accrued interest payable of \$3,897.

7. CAPITAL STOCK (cont'd)

Stock Options (cont'd)

The Company has valued the stock options granted using the *Black-Scholes Option Pricing Model* with the following assumptions: risk-free interest rate 1.42%; volatility 167.9%; dividend yield 0% and approximate expected lives of five years. The resultant value of \$183,649 has been charged to stock-based compensation expense and contributed surplus. These options expire in various amounts from 2011 to 2015.

Warrants

A summary of the share purchase warrants outstanding at October 31, 2010 is as follows:

	2010		2009	
	Number of Common Shares Issuable	Weighted Average Exercise Price \$	Number of Common Shares Issuable	Weighted Average Exercise Price \$
Warrants outstanding, beginning of the period	27,378,186	0.31	18,518,519	0.42

Expired	—	—	—	—
Warrants outstanding, end of the period	41,778,186	0.10	27,378,186	0.31

During the three months ended April 30, 2010, the Company received regulatory approval to reprice the exercise price of 18,518,519 warrants from \$0.42 per share to \$0.10 per share, expiring on April 26, 2011. The resultant incremental value of \$182,659 due to the modification of these warrants has been recorded as a charge to the deficit and a corresponding increase to contributed surplus. These warrants expire in various amounts from 2011 to 2015.

8. INCOME TAXES

As at the Company's last fiscal year, January 31, 2010, the Company had the following estimated deductions available to reduce future taxable income, which can be carried forward indefinitely: \$9,412,000 of Canadian and foreign resource exploration expenditures and \$174,000 of undepreciated capital cost allowance. In addition, the Company has non-capital losses of \$4,397,000 available to reduce future taxable income which expire in various years from 2011 to 2030.

OCTOBER 31, 2010
(Unaudited – Prepared by Management)

9. RELATED PARTY TRANSACTIONS

- (a) Related party transactions with directors and officers (or companies controlled by them) during the nine months ended October 31, 2010 and 2009 are as follows:

	2010	2009
Consulting fees	\$ 7,500	\$ 7,500
Exploration expenses (geological consulting, field crew labour and other)	54,296	8,177
Interest and accretion on debenture	13,164	—
Rent	15,348	10,560
Rental income from equipment	5,708	13,260

- (b) The balances due from related parties represent balances due from directors and officers or companies controlled by them. The amounts are non-interest bearing and have no specific terms of repayment.
- (c) The debenture payable is due to a company controlled by a director of the company and its terms are as outlined in Note 6.

Related party transactions are in the normal course of operations, occurring on terms and conditions that are similar to those of transactions with unrelated parties and, therefore, are measured at the exchange amount.

10. SEGMENTED INFORMATION

All of the Company's operations are in the mineral resource exploration industry with its principal business activity in the acquisition, exploration and development of mineral resource properties. The Company has resource properties located in Australia and Zambia. The location of the Company's resource properties and related expenditures by geographic area are outlined in Note 5. The equipment is located as follows: \$3,844 in Canada and \$34,034 in Australia.

11. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgement, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

In conjunction with its accounting policies, the Company classified its financial instruments into the related categories. Cash and cash equivalents, restricted cash and deposits are classified as held-for-trading; accounts receivable are classified as loans and receivables and accounts payable and amounts due to related parties are classified as other financial liabilities. The carrying value of cash and cash equivalents, restricted cash, accounts receivable, deposits, accounts payable and amounts due to related parties approximates their fair value because of the short-term nature of these instruments.

The Company is subject to currency risk as it conducts operations in jurisdictions other than Canada, primarily being exposed to changes in the Canadian dollar compared to the Australian and United States dollars. The Company has not hedged its exposure to currency fluctuations, but does manage its cash resources to complement the denomination of the expenditures required. This risk is minimal due to significantly reduced operations.

The Company is subject to interest rate risk as it invests excess cash not immediately required for operations, in short-term investments. This risk is minimal as the Company does not have significant amounts of excess cash to invest and its investments are in instruments with short-term maturities.

The Company is not subject to significant credit risk as its receivables are due from government agencies, so the risk is minimal.

The Company is subject to liquidity risk in that the Company may not be able to meet its financial obligations as they come due. The Company manages this risk through the management of its capital structure as outlined in Note 1.

12. SUBSEQUENT EVENT

Subsequent to October 31, 2010, the Company granted a non-related purchaser the option to acquire the Yuinmery licence for an option payment of \$10,000 which is refundable if the licence cannot be extended within six months, for a further two years to 2012. Once the licence is extended, the purchaser has the right to exercise its option to acquire the licence for a cash payment of \$60,000 plus shares worth \$50,000.
